

COMMUNITY ENERGY PLUS

Community Energy Plus Environmental Policy Statement

Community Energy Plus recognises its responsibilities towards the environment and seeks to ensure that whilst its impact within the market place is maximised, its impact on the world in which we live is reduced wherever possible. Community Energy Plus also makes a positive contribution to reducing the environmental impact of homes, businesses and community groups in Cornwall and the South-West through the promotion of behavioural change in the areas of energy efficiency and renewable energy.

We are committed to the prevention of pollution and ensuring that our processes and projects are delivered in accordance with the relevant environmental legislation and environmental best practice.

Community Energy Plus aims to:

- Manage its activities with consideration for the environment and in a manner which is consistent with our values.
- Minimise its impact upon the environment by reducing energy consumption, transport and carbon emissions and throughout 2010/11 will be developing a Company Carbon Footprint.
- Where feasible, purchase products and services from supply chain partners who have demonstrated a commitment to good environmental practice.
- Set targets and objectives for environmental improvement and review these regularly to demonstrate our commitment to continual environmental improvement.

To assist in achieving our environmental objectives, Community Energy Plus has an ISO14001 compliant Environmental Management System which will be certified during 2010.

This policy has been communicated to all employees of Community Energy Plus as well as those working on our behalf and is available to the public upon request.

Dr Tim Jones (Deputy Director)
Director responsible for Quality and Environment
