

Since 1997 our team of skilled and experienced energy advisors have worked on a number of trail blazing projects in communities across the county.

We've helped to put Cornwall on the map as a regional leader in renewable energy production while ensuring that communities are at the forefront of leading the development, implementation and enjoying the benefits of renewable energy schemes.

Find out how we can help you turn your plans for a more sustainable, profitable future into a reality.

Planning for Renewables

Our solar, wind, wave, tidal, hydro and geothermal resources in Cornwall provide an exciting opportunity for us all to harness renewable energy technologies to adapt to the challenge of rising energy costs while generating an income and reducing carbon emissions that contribute to climate change.

Whether you're a householder, business or community group, Community Energy Plus can support you in developing and managing all stages of your project, including:
